

NOBLES POND 2023 TECHNOLOGY IDENTIFIER GUIDE

Identify Which Systems You Have

You will need to look for the items below. Some items will be in the Media Enclosure located in your Garage.

LIGHTING

Your Lighting Controller head unit will look similar to one of the units below...

Lutron Caseta (2023 and on)

Legrand On-Q 7001 (2022 and prior)
Discontinued by Manufacturer

Identify your system, download the appropriate app, & follow the app instructions to connect.

Home Audio

Your Audio Keypads in each zone will look similar to one of the units below...

Russound V-KP-1 (2023 and on)

Legrand On-Q PW1020 (2022 and prior)
Discontinued by Manufacturer

Network & WI-Fi

Your home could have been wired a few different ways for networking, depending on the options chosen when the home was initially built or if items were added at a later date. But all homes come with a Media Enclosure located in your garage, this is where all wiring in the home originates from, and where most if not all 'Whole-Home' devices like the Lighting controller etc are housed.

Verizon Router - This needs to be installed near the Media Enclosure so it can connect directly to these systems with a wire. (typically on the wall next to the enclosure). You must contact Verizon for this and service.

*Wi-Fi - Older homes may have an antenna device located on the ceiling in the laundry room or just off the garage. These devices were removed from more recent homes, and maybe disconnected in some homes, as they are discontinued and no longer supported in favor of updated technology in the Verizon routers and extenders.

Verizon Network & Wifi Extenders (2023 and on)
Optional Add-Ons

LUXUL WIFI AP (2022 and prior)
Discontinued by Manufacturer
